Polycarbonate and Aluminium

COFFRE is a fully-assembled parking lot for **bikes and scooters** with a maximum* capacity for 20 spaces ready to be connected and fixed to the ground. It is made of aluminium and polycarbonate with UV protection. Optional exterior decor.

HANGAR is a parking lot for bikes with a **modular structure** and a double sliding entrance door all made of aluminium and transparent polycarbonate with UV protection on both faces.

Optional
Exclusive
Solar
Photovoltaic
System

BREADBOX is a parking lot for **bikes and scooters** with a maximum* capacity for 7 spaces and a design that allows to store **larger bikes or even bikes with child back seats**, within the smallest available space.

SCOOVER is a parking lot specifically designed for **scooters**, with a maximum* capacity for 8 spaces. It has a system that allows users to leave scooters unlocked and store helmets in single lockers as well as an electrical power outlet to safely plug in chargers.

*variable capacity depending on the desired distance between spaces

Featured Options

PFB Parkings For Bikes Firesafe

P4BF is an optional and exclusive Parkings For Bikes Firesafe designed by Idderman, Equipro and Fire Piping to prevent a bicycle battery fire from spreading over other batteries inside the parking.

PHOLARUS Solar Photovoltaic Systems

Pholarus is a set of optional Solar Photovoltaic Systems exclusively designed for Parkings For Bikes that makes them work on a self-powered mode and allows users to charge their electric bicycles.
